See separate form.

Total 121/242

Level 3

Comments

You mastered the Japanese grammar and vocabulary that you have studied. Your daily conversation skills became much better than before. Even though the test was difficult for your level, you tried hard. This attitude is necessary to learn language. Please keep on studying at your pace. (Tajima)

You can read and write Hiragana and Katakana. You can speak whatever you want in simple Japanese in daily life. I'm very much impressed that you always try to use new structures, words and expressions in conversations. Now you are able to express yourself in many situations. Use Japanese as much as possible! Your Japanese will improve as much as you use it. (Kimura)
